

Testbed program in Lithuania

Join with your product!

Are you an EdTech solution provider looking to enhance your educational technologies and innovative solutions?

Our Testbed program aims to apply the latest innovations in educational institutions. School representatives can try out your created solutions in real-life classroom settings for at least two months.

How it works?

EdTech company creating
NEW solution

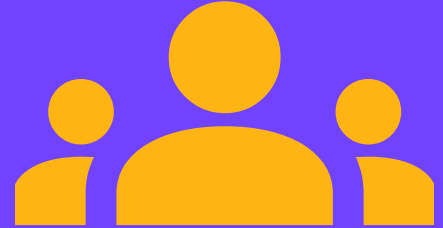

Solution comes to our
Testbed platform

Individual agreements
between creator and school

Solution testing phase
in schools

Schools and our EdTech
experts give feedback to
creators

Creator improves solution

Solution comes to
market

What's even better

is that after the Testbed, successful EdTech solutions will be incorporated into the educational process improving the quality of teaching. Teachers can choose the best educational technology and innovation solutions for their students

We're looking for

interactive learning tools and innovative digital content that use the latest information technology capabilities to make learning more engaging and effective.

It's a fantastic opportunity

to get valuable insights from teachers, students, and education experts for free and learn about everyday learning and student needs.

As a result, you can develop and enhance your solutions and learn how to apply the latest educational technologies in future.

Over **200** schools and **20,000** students have already participated in our Testbed!

Let's make education even better together!
